

NAQ'S 2021 TECH PREDICTIONS

A

AI AND AUTOMATION

The consequences of over reliance on human intervention will accelerate the need for AI and automation

B

BIOTECH

While we get all wrapped up in cybertech, let's not forget how Coronavirus hogged the limelight in 2020. Future bio threats are a real possibility. 2021 will see more bio and tech scientists working closely to build collaborations to address biosafety

C

CLOUD

As private and public businesses and communities come to grip with the need for accessibility, agility, security, cost reductions and business continuity, cloud computing will play an even larger displacing role

D

DEMOCRACY OF TECH

Democratization of tech will accelerate exponentially with the unexpected disruption by Covid and the introduction of new products, tech and methods of doing business. Consequently, the rise in cyber threats and counter cybersecurity measures and policies.
