ABOUT

Esther Wee handles all aspects of IP matters concerning trademarks, patents, copyright, industrial designs, trade secrets and confidential information. Her clients include multinational corporations, publicly listed companies and SMEs from a diverse range of industries including IT, communications, electrical and electronics, biotechnology, green technology, pharmaceutical, food and beverage and retail.

Esther's expertise lies in devising and managing comprehensive IP filing and protection strategies: From advising pre-emptive measures in registering and securing IP rights, to initiating criminal and civil action against IP infringers through enforcement actions and/or litigation.

Notably, apart from protection and enforcement strategies, Esther also assists clients in maximizing the return on their IP investment by advising on licensing or franchising agreements relating to corporate acquisitions, joint ventures and strategic business activities.

She is also an avid speaker and has conducted many trainings and workshops on IP with different organisations in both Malaysia and Singapore.
